3D printed models

Art for blind and partially sighted people

The main building
20 x 19 x 14 cm

The East Pavilion
20 x 25 x 8 cm

Totem Pole Replica
7 x 7 x 20 cm

Lion Statue
10 x 10 x 25 cm

The West Pavilion
20 x 25 x 5 cm

These 3D models were presented to blind and partially sighted visitors during the **Rolling Stones – Unzipped** exhibition at Groninger Museum in 2023.

3D Vase Puzzle,

2023, 3D printed model
An artistic educational tool

Full puzzle
15 x 15 x 25 cm

This work is presented in the *Missie Meesterwerk* Exhibition at the Rijksmuseum in 2023.

The 3D vase puzzle is designed as an artistic education tool for visitors to learn about ceramic restoration in art museums. There are 7 puzzle pieces that represent broken ceramic shards. Visitors are given the task to solve and recreate a complete vase out of it.

Kan met Deksel
10 x 10 x 25 cm

Kan met Deksel Replica

-2022-

3D Printed model

Art for blind and partially sighted people

This work is presented to blind and partially sighted visitors during the *Onderkruipfels* Exhibition at the Rijksmuseum in 2022.

Indonesian Masks Replicas

- 2021-

3D printed models

Art for blind and partially sighted people

This work is presented to blind and partially sighted visitors during the **Slavery** Exhibition at the Rijksmuseum in 2021.

Indonesian Masks Replica
10 x 18 x 10 cm

Process:

The replicas of these Indonesian masks are made with the technique of photogrammetry, which is a method of creating a digital 3D model by using a series of images. This artistic technique allows me to create a realistic replica of an artifact during the Covid 19 pandemic, when the museum was inaccessible.
